Dear Staff at FDA,

7289 '99 JUL 23 A10:12

I am opposed to food irradiation; I don't believe it's been studied over a sufficient number of generations to be proven safe. From various information I've read, I don't believe it's proven beneficial either.

In light of these, & other considerations I have serious reservations about, I want, at the very least, that food so treated (irradiated) will be clearly labelled.

Thank you.

Sincerely,
Patricia Blauin Penno
